## **DETAILED ACTION**

This office action is in response to the amendment filed 12/2/02.

### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1: method of making a soft metal conductor wherein the grains have a grain size of not less than 200 nm (claims 21-24, 26, 27, 67-69).

Species 2: method of making a soft metal conductor that comprises heating to increase the grain size (claims 28-34).

Species 3: a method of polishing a soft metal structure (claims 35-38).

Species 4: a dual step deposition method wherein the first layer is deposited by PVD and the second layer is deposited by CVD, electroplating or electroless plating (claims 39, 41-45).

Species 5: a dual step deposition method wherein the first layer is deposited by CVD and the second layer is deposited by PVD, electroplating or electroless plating (claims 46-48).

Species 6: a method for forming an interconnect that comprises depositing a metal layer consisting of Cu, Ag, Al, CuAg, CuAl, AgAl or CuAgAl followed by depositing a Cu layer having an average grain size of not smaller than 0.3  $\mu\text{m}$  (claims 49-51).

Species 7: a method for forming an interconnect surrounded at least on three sides by an amorphous barrier layer (claims 52-59, 61, 62).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. L. Brophy whose telephone number is (703) 308-6182. The examiner can normally be reached on M-F (8:00-5:00).
